presto

print media

What sets Presto's print media apart? It's simple...

substrate + adhesive

Our canvas and polyester fabric create a look that no competitor can match. With white, silver, and gold iridescent finishes, you can truly offer your customers graphics that will transform any space.

The thickness of our products allows for super easy installation and it helps cover imperfections in your surface! It also makes our products far more opaque than other products on the market.

In addition, our materials can easily be contour cut without fraying and it won't rip, shrink or curl!

Our exclusive microsphere adhesive allows your graphics to always be easily removed and even be repositioned a truly unlimited number of times!

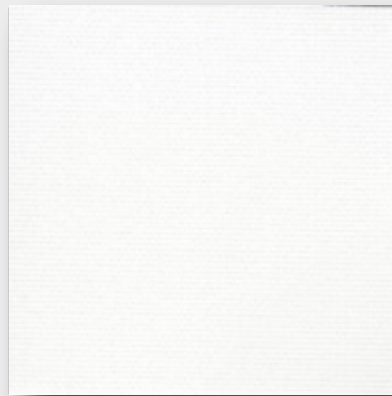

Your clients will never have to worry about damaging their walls because our adhesive won't leave residue or peel paint like most of the competitors.

PrestoTex

PrestoTex is a 7 mil polyester fabric backed with removable and repositionable adhesive. The material adheres to virtually any non-porous surface and removes without peeling paint, leaving residue, or damaging walls. Our polyester fabric provides a long-lasting graphic with a beautiful finish. PrestoTex is the perfect product for printing interior wall murals and graphics.
